travel, read comic books, inline
skating

YELIZ IS...

A fourth-year Communication and Multimedia Design student at Hogeschool van Amsterdam with a focus on UX design, accessibility, and front-end development. My passion lies mainly in front-end development.

EXPERIENCE

● Client: Tumi mundo

Front-end developer

2024

- Collaborated with a team to develop a web application for tracking the attention span of babies
- Used the face tracking API to accurately track faces during the attention span test
- Designed and developed the customization page
- Used HTML, CSS, JavaScript, and SvelteKit and is fully responsive

● Client: Datagravers

Front-end developer / designer

2024

- Visualized data of all the members of the parliament between 1815 to 2023 in an interactive treemap
- I was involved through the whole process from concept to development
- The app utilizes Html, Css, Javascript, D3.js and Svelte
- Collaborated in a team project environment

● Stage TargetMedia

Back-end developer

januari - juni 2019

- Together with a team we developed a QR generator using PHP and Yii framework

EDUCATION

● Communication and Multimedia design - HVA

2021 - now

● HBO-ICT - Windesheim Flevoland

2017 - 2019
